

Zifan Li

587-436-4825 | zifan.li912@gmail.com | www.linkedin.com/in/li-zifan | zifan-portfolio.vercel.app Edmonton, AB

EDUCATION

University of Alberta

Edmonton, AB

Bachelor of Science in Computing Science (Specialization)

Expected 2027

Relevant Coursework: Software Engineering, Reinforcement Learning, Visual Recognition, Search and Planning in AI, Web Applications, Human-Computer Interaction, Machine Learning, Database Management

TECHNICAL SKILLS

Languages: Python, Java, C, SQL, JavaScript

AI/ML: PyTorch, RAG, LangChain, LangGraph, OpenAI API, Embeddings, Vector Search, Prompt Engineering

Infrastructure/Tools: FastAPI, Django, Git, REST APIs, ChromaDB, Streamlit

EXPERIENCE

Waiter

May 2024 – Sep 2024

New Club Cafe

Vulcan, AB

- Orchestrated service operations in a high-volume environment, prioritizing tasks to maintain efficiency and customer satisfaction standards
- Facilitated seamless communication between front-of-house and back-of-house teams to resolve service bottlenecks and ensure timely delivery
- Managed client relationships and conflict resolution, adapting quickly to changing requirements in a fast-paced setting

PROJECTS

AI Portfolio Assistant | *Python, FastAPI, LangChain, ChromaDB, JavaScript*

- Building an end-to-end RAG chatbot integrated into personal portfolio website to answer queries about me
- Implemented document ingestion pipeline to chunk and embed profile data into ChromaDB
- Developed backend API using FastAPI to handle context retrieval and generation via OpenAI/LangChain
- Designed user-facing chat interface with JavaScript for seamless interaction with the AI backend

Heart Disease Predictor | *Python, XGBoost, Streamlit, SHAP*

- Engineered a predictive system by benchmarking Logistic Regression, Random Forest, and XGBoost models, achieving 88% accuracy with the selected XGBoost classifier
- Optimized model performance using GridSearchCV for hyperparameter tuning, achieving improved generalization
- Implemented SHAP visualizations to interpret model predictions and identify key risk factors
- Deployed an interactive web interface allowing users to input health metrics and receive real-time predictions
